Note: The CMS case weights for each diagnosis related group (DRG) were applied to the FY 2013 inpatient discharge data submitted by each hospital. All-payor data were used to provide more robust statistics. The resulting case-mix index (CMI) was used to adjust the allowed charges.

\*A prior year's case mix was used for St. Joseph's Hospital due to conversion to critical access hospital, and for CAMC Teays Valley due to the merger with CAMC.
